

DESCRIPTION

Sealoflex Joint Backer Rod is a closed-cell polyurethane backer rod is utilized as a backing material in expansion joint sealing applications to prevent adhesion on three sides.

KEY FEATURES

- Application is fast and simple.
- Minimizes the amount of sealant needed.
- Offers flexibility in usage.
- Enhances sealant effectiveness by ensuring the proper joint size.

USES

To decrease joint depth, insert the backer rod into the joint prior to sealant application.
